

TOWN OF JAMAICA

******* WARNING *******

The forecast for the next 48 hours calls for heavy rain 1 to 2 inches of rain which has triggered another flood watch.

While this amount of rain is nowhere the 9" we received last weekend, there is cause for concern.

The repairs on the roads were a temporary fix. Although they are passable, they may fail again. If they do fail, the repairs will not be as fast as the last storm.

PLEASE BE ADVISED THAT THE ESTIMATED TIME TO REPAIR THE ROADS IS 10-14 DAYS.

WHILE THIS IS NOT AN ORDER TO EVACUATE, please use your best judgement as whether or not you should seek an alternate location before the roads become impassable. If you do stay please make sure you have the necessary essentials (food, water and medicine).

If you have an emergency please call 911.

Thank you
